## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 10-13 which have been renumbered as 1-4, are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-4, the prior art of record fails to teach of a session close notice packet containing an indication of the calculated session continuation time and a communication session closing after the plurality of packets are transmitted, and a control information receiving component that receives a session close notice packet, which includes an indication of a session continuation time from the data transmitting source. The closest reference, Zink et al., teaches of a sender, a receiver, round trip time, the closing of a session and a request for the retransmission of lost packets, but fails to teach of a session close notice packet containing an indication of the calculated session continuation time and a communication session closing after the plurality of packets are transmitted, and a control information receiving component that receives a session close notice packet, which includes an indication of a session continuation time from the data transmitting source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
